Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 December 2006.

DETAILED ACTION

Response to Appellant's Appeal Brief

1. In view of the appeal brief filed on 12/21/2006, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4-10, 22 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,389,414 to Popat.

Popat discloses a blank (20) comprising a sheet of paper (46) having a first transverse line of weakening (30), a second line of weakening (32) transverse to the first line of weakening. Popat discloses that the sheet into quarters along lines of weakening (30, 32) (column 4, lines 26-29). This meets the recitation “a first transverse line of weakening to divide said sheet into half”. The lines of weakening divide the sheet into four areas. Each of the areas include die cut, removable sections that are each respectively spaced apart from an adjacent removable section on an opposite side of each line of weakening. The blank further comprises a layer of adhesive (49) on each of the sections and a removable liner (48) disposed over the adhesive.

Having met the structure of applicant's claimed device, the blank of Popat is considered to be capable of: “making at least one laminated novelty product”, “receiving imaging” on a first removable section, “receiving imaging” on a second removable section “related to the imaging on said first section”, “folding of said first second and said section over each other to allow said adhesive to laminate said first removable section with said second removable section” in “back-to-back relation” and “folding over” a fourth section “onto said removable section of said third area”.

Regarding claim 10, Popat discloses the paper of the blank may be made of “card stock” to form business cards. The card stock disclosed by Popat is considered to

Art Unit: 3782

be sufficiently broad so as to include card stock materials that are of "photo quality" and "water resistant".

Allowable Subject Matter

4. Claims 1-3, 11 and 12 allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 4, 5, 8-10, 22 and 23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
